

ANALYZER SYSTEM AND DRIVE MECHANISM FOR SAME

ABSTRACT OF THE DISCLOSURE

1 An analyzer system has an instrument holder that can
2 hold at least two instruments and is movable along a
3 vertical guide. At least one washing device is provided
4 for the instruments, with one or more jet orifices fed by
5 a supply conduit to spray wash fluid at the instruments.
6 The washing device comprises one or more wash rings
7 surrounding the instruments. The washing device is
8 separate from and movable in relation to the instrument
9 holder, and the one or more jet orifices are aimed at the
10 instruments positioned inside the one or more wash rings.
